RE: Comments on the Groundwater Monitoring Semi-Annual Report Dated June 28, 2013, for the
Solutia - J.F. Queeny Site, St. Louis, Missouri
EPA ID No. MOD 004 954 111

Dear Mr. Rosen:

The U.S. Environmental Protection Agency Region 7 and the Missouri Department of Natural Resources have reviewed the subject document and are providing the following comments to be addressed in a revised submittal within 30 days of receipt of this letter.

1. Appendix B should be revised to provide the analytical data to support the February 11, 2013 results provided on Table 2. For instance, analytical data to support the entries in Table 2 for Monitoring Well MW-28A was not provided in Appendix A or B.
2. The results for benzene and chlorobenzene in Table 2 for the Monitoring Well MW-28B sample collected on February 11, 2013 should be shaded because they exceed their respective MCL values.

If you have any questions concerning these comments, please call me at (913) 551-7755, or Christine Kump-Mitchell at (314) 416-2960.

Sincerely,

Bruce A. Morrison
